High levels of T4
Low levels of TSH
Shrinkage of thyroid
What's the cause:

- A) taking propylthiouracil
- B) taking exogenous thyroxine
- C) lesion in anterior pituitary preventing release of TSH
- D) grave's disease
- E) thyroid tumor

(B الجواب)

Which of the following causes hypoglycemia?

Amylin xxx

Glucagon

Epinephrine

Cortisol

GH

الهرمون المشابه لل ADH:

Oxytocin

مريض عنده DM1 ودخل المشفى، لما يعطوه

انسولين، رح يزيد عنده شي :

الجواب : blood PH

Which hormone is synthesized and stored in
Anterior pituitary?
Growth hormone

15. 1, 25-Dihydroxycholecalciferol affects intestinal Ca^{2+} absorption through a mechanism that
- A. includes alterations in the activation of genes
 - B. activates adenylyl cyclase
 - C. decreases cell turnover
 - D. changes gastric acid secretion
 - E. is comparable to the action of polypeptide hormones

A
