-Judgment

-Panic attack and panic disorder heroin withdrawal.

- ask about orientation

- tell me every about WernickeKorsak off syndrome ,cause , pathophysiology , presentation , Mx, importance of thiamine

- tell me about anti-psychotic

- Ask about the abstract (2 ways)

- Mania vs. hypomania (with the criteria for mania)

- Neuroleptic malignant syndrome

-Ask about abstract

-Dysthymia -Narcolepsy

-Amphetamine

-orientation

- every thing about ADHD

-SCHIZOPHRENIA

Another Group ..

- 1-Criteria and treatment of border line personality
 - 2-Type of psychosis that came with it
 - 3-Opiate withdrawal symptoms and treatment
 - 4- Assess Orientation
 - 5- Talk about MDD with criteria
 - 6- Talk about narcolepsy
 - 7-check insight on this patient
 - 8-schizophrenia criteria A B C D
 - 9-everything about neuroleptic malignant disorder
 - 10-Check attention and concentration on this patient
 - 11—Delusional disorder +types , Panic disorder criteria
 - 11-MDD criteria , definition and "cannot be explained by medical causes " are included .
 - 12— schizophrenia "dopaminergic pathways "
 - 13-orientation assessment
 - 14-Mental Exam. > judgments
 - 15- Schizoaffective criteria
 - 16-Mania criteria
 - 17-Schizophrenia criteria
 - 18-Delusional disorder TYPES
 - 19-delusional jealousy/infidelity other name? > Othello syndrome
 - 20-Describe generalized anxiety disorder and Schizophrenia effective disorder
 - 21-Abstract assessment on this patient
-

- 1-Assess Abstract
- 2- difference btw mania and hypomania

3-criteria for mania

4- talk about neuroleptic malignant syndrome and its management

5-smth lead to renal failure, why ? Rhabdomyolysis >> myoglobin shift from muscles to the kidney causing renal failure

وسألني عن MDD حكيت كل اشي عنها و رجعت بالمعلومات ل major depressive episode و برضه حكيت عنها... و لما وصلت لنقطة بال criteria عن ال agitation حكالي وين بنشوفها عاى عند أي فئة عمرية اللي هو بالعشرينات... يعني الفكرة ممكن المريض يكون depressed بس ال agitated = activity عادي

6-Serotonin syndrome

7-Delerium /dementia

8-Insight mental exam and orientation and delusion , perception

9-Criteria of schizophrenia ,,Mdd

10-Diff btw delusion and schizophrenia

11-Types of delusion

12-Drug of choice for depression and insomnia

13-Antiemetic drug and antipyretics we use

14-Define delusion+ hallucinating

15-Panic attack criteria

16-Drugs of choice for delirium tremens

17-Alcohol withdrawal symptoms

18-Heroin withdrawal symptoms

D3 + D4

Student 1

- 1- Asses the patient's orientation
- 2- How do we diagnose ADHD?Tx?
- 3- Talk about delirium and it's Tx?

Student 2

- 1- Insight
- 2- Antisocial criteria
- 3- Neuroleptic malignant syndrome كل شي عنه

Student 3

- 1- Asses the patient orientation
- 2- Criteria of major depression episode
- 3- Talk about adjustment disorder
- 4- -Example of unspecific physical illness in adjustment disorder (headache _ muscle pain)
- 5- -Difference between GAD and anxiety

Student 4

- 1- Orientation
- 2- criteria II schizophrenia
- 3- Loperamide how it works to decrease Diarrhea ?
- 4- ask about detromthorphan .
- 5- example II opiate *كلهم
- 6- why opiate used "not medical " ?
- 7- why we use opiate medically ? strong painkiller

Student 5

- 1- abstract ,ADHD criteria + management + side effect amphetamine وسأل شو هي حاله الي ما بستخدم فيها amphetamine!!!...
- 2- (Epilepsy) , كل شي عن
- 3- Narcolepsy..... وسأل كم sudden attack of sleep in the day time?
- 4- 3 , differentiation between hallucinations and pseudohallucinations!?
- 5- definition sleep paralysis+ cataplexy

Student 6

- 1- Asses the Abstract of the patient
 - 2- -Criteria for Mania episode
 - 3- -Atypical antipsychotics the 3 major examples(mentioned by the doctor) with each one's specific adverse effect
-

C1 + C2

Student 1 :

- 1- Antisocial personality
- 2- Delusion disorder
- 3- Abstract

Student 2 :

- 1) Examine the Judgment
- 2) talk about antisocial personality and criteria disorder
- 3) talk about delusional disorder and criteria and types

Student 3 :

- 1- Assess Abstract
- 2- DT symptoms? / when? / differ from normal delirium / Mx
- 3- Mood disorder (mania) Criteria

Student 4 :

- 1- Insight
- 2- Brief psychosis (definition , duration , treatment)
- 3- Panic disorders (criteria, symptoms, treatment)

Student 5 :

- 1- Abstract
- 2- Major depressive disorder "criteria + Mx"
- 3- Definition of phobia & social phobia which SSRI we give
Why we choose SSRI to treat MDD ? Less SE/ cost , safer

Student 6 :

- 1- Orientation
- 2- how to diagnose MDD
- 3- Neuroleptic malignant syndrome

Student 7 :

1- Abstract

2-Borderline criteria

3-Schizoaffective criteria, does it have better prognosis than schizophrenia ? Why ?

Student 8 :

1- Examine abstract (3things to ask).

2- differences between Delirium and Dementia.

3- everything about Opiates withdrawal.

Student 9 :

1- Abstract

2- Major depressive disorder "criteria + Mx"

3- Definition of phobia & social phobia which SSRI we give

Student 10 :

1- Insight

2- OCD definition types Ttt

3- Everything thing about panic attack and disorder ,Why in panic disorder we alprozalam

Student 11 :

Judgment , talk about autism , why we give low dose antipsychotic in autistic patient , delusional disorder " define , criteria , subtypes "

Student 12 :

1-examin the orientation of the patient (three things: time,place,person)

2-ADHD diagnosis and types(3 types:hyperactive,attention deficit , mixed) and treatment

3-opiates(names of the drugs, uses, opiates withdrawal symptoms and treatment)

Student 13 :

1-Examin attention and concentration

2-Talk about hypomania and its criteria

3-Name somatoform disorder

Student 14 :

- 1- mental examination : insight
- 2- hypo mania diagnosis and treatment
- 3- delirium tremens

Student 15 :

- 1- Examine Insight
- 2-Borderline PD criteria \ Borderline PD defense mechanism
- 3- Narcolepsy criteria and associations

C5+C6

1) Examine the orientation..

Hypomania criteria..

All the side effect of neuroleptic drugs (typical + atypical)

Bonus : normal WBC ? / neutrophils ?+ agranulocytosis (leukopenia) WBC ?

2) (assess the abstract of the patient)-All what you know about borderline personality

-depression definition , criteria

-all antidepressant drugs

MAOIs side effects

3)Insight ^Examination^

Criteria and ttt of MDD

Delirium tremens definition and ttt

4)Antisocial personality

Talk about panic attack

Ttt of panic attack

Assessment of orientation

5) memory exam ..

talk about delusion disorder?

talk about delirium ? ..

why we give antipsychotic in delirium?

6) Assess attention & concentration of the Pt.

DSM-IV criteria for schizophrenia ??

Subtypes & phases of it (with details) ?? Which is the best , and which is the worst subtype ??

ECT is used for ttt in which one of the subtypes ?? Bonus++

7) Abstract

Borderline personality

Antidepressants

كل شي عن opiate

8)

1- Abstract

2- mood disorders

3- antipsychotic drugs

9) everything about schizophrenia
